Date: 28 - 30 October 2025

Location: ExpoMag Convention Center, Rio de Janeiro

Join the **UK & EIC Pavilion at Offshore Technology Conference (OTC) Brazil 2025** to secure a prime stand location, enhanced promotion and visibility as well as access to industry experts through our extensive networking opportunities.

OTC Brazil is one of the main offshore events in the world, right in the heart of Rio de Janeiro. Attracting leading experts, offshore E&P and technology companies, OTC Brazil acts as the ideal place for industry professionals to share knowledge, generate new business, and showcase the best practices and emerging trends in the ever-evolving offshore energy sector.

Join us and be a part of the experience!

Market Intelligence

Benefiting from high productivity levels and low exploration risk, development of Brazil's massive oil and gas reserves is in full swing. Petrobras's recently launched 2025-29 business plan calls for an investment of US\$111bn in the five-year period, of which US\$77bn are allocated to E&P activities across the country. During this period, the Brazilian national oil company has an ambitious goal to install nearly 10 new FPSOs and drill hundreds of development wells across the Santos and Campos basins. Another goal is to replace reserves by exploring new frontiers across various basins - including the promising Equatorial Margin area - with the drilling of more than 50 exploration wells.

In 2024, Petrobras awarded major EPC contracts to Seatrium for the P-84 and P-85 FPSOs to be deployed in the Santos basin, while tenders are ongoing for additional units elsewhere in the country. The company has also awarded key subsea contracts to TechnipFMC, Allseas, Subsea 7 and SLB OneSubsea. While Petrobras remains Brazil's top E&P player, IOCs and independent oil companies are also advancing major projects. Equinor is making progress with its Bacalhau and Raia Manta/Raia Pintada offshore oil and gas fields in the Santos and Campos basins. Independent players such as Brava Energia, Trident Energy, PRIO and Karoon are also providing key opportunities for the supply chain. In total, EICDataStream is currently tracking 87 E&P projects in Brazil, with a combined CAPEX of US\$142 billion. With projects ranging from exploration to decommissioning, IOCs to independent players, onshore to offshore, Brazil is a natural target for the global oil and gas supply chain.
