Date: 19-22 May 2025

Location: Phoenix, Arizona, USA

Join the UK & EIC Pavilion at CLEANPOWER 2025

ACP's CLEANPOWER unites the most knowledgeable minds in clean energy to chart the future of this powerful industry and discuss the opportunities ahead. As previous attendees attest, the conference grows clean energy businesses by gathering key decision makers and stakeholders across the wind, solar, storage, hydrogen, and transmission industries for discussion, deal making, networking and fun.

Market Intelligence

Two years into the introduction of the Inflation Reduction Act, the clean energy sector strengthened its foothold in the US market. The number of new renewable projects in the US has increased by over 25% in mid-2024 compared to the same period in 2023, a trend that is also observed in the clean hydrogen, carbon capture, utilization and storage (CCUS) and energy storage sectors. EICDataStream now tracks over 1,350 clean energy projects in the country, with a potential CAPEX of more than US\$725 billion and a combined generation capacity of 221GW. From the multiple offshore wind farms being developed in the Eastern Seaboard to transformational clean hydrogen and CCS projects in the Gulf Coast and beyond, the US is a leading player in the development of clean energy technologies.
