Steel Fabrication - Ehouses - Substations -
Blast Modules & HVAC Systems

Overview

IMS Energy Ltd are based in Middlesbrough, with a blue chip global customer base. We are a well established and highly regarded business providing multi disciplinary engineering, fabrication and project management services. Our experienced commercial and project management teams work closely with our clients to deliver the best project solutions whilst never compromising on safety and quality. We have successfully supplied offshore wind infrastructure products including truss structures, transition pieces, boat landings platforms, lifting & spreader frames and associated sea fastenings. IMS Energy Ltd are also leading manufacturer of accommodation containers to offshore, marine, renewable & oil and gas operators. We also meet the required standards for installing welfare and accommodation containers offshore.

Factory

IMS Energy completes work from two manufacturing facilities situated in a prime locations outside the town centre of Middlesbrough. The facilities combined, benefit from over 100,000 square feet of manufacturing / fabrication with 50,000 square ft lay down. These premises include office space, welfare and additional contractor's offices.

There are approximately 35 employees based at the manufacturing sites. Trades covered include but are not limited to Fabrication / Welding / Outfitting / HVAC and Electrical fit-out.
