About the Energy Exports Conference 2024

The Energy Industries Council (EIC), along with the organising partners, are delighted to bring together the international energy sector through this flagship event which connects global energy experts, presents on various opportunities and will encompass a wide range of possibilities across different sectors and technologies.

Following on from the United Nations Climate Change Conference COP28, the Energy Exports Conference in Aberdeen (Scotland) will continue to discuss the initiatives and opportunities designed to speed up the energy transition, and showcase the supply chain who are providing the right skills and expertise to support the evolving energy landscape.

With a growing global emphasis on cleaner energy sources and sustainability, there's never been a better time for the UK to export and promote their products, services, solutions and technologies.

Join us at EEC 2024 and find out how your business could benefit as we build international connections and explore the projects across the oil and gas, hydrogen, carbon capture, wind and nuclear industries.

Organising Committee:

Exhibitor Benefits

Raise your profile
with global operators
and contractors

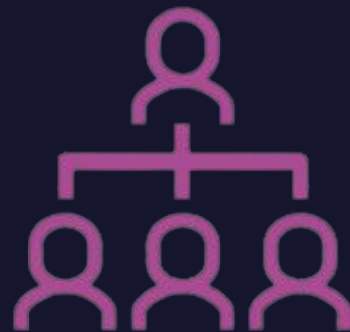

Increase brand
awareness

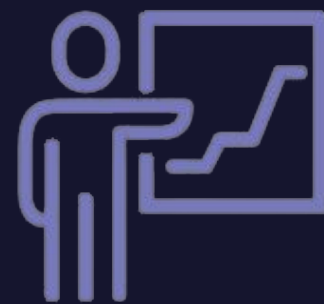

Enhance credibility

Improve your
media exposure
