# OUR MISSION IS TO COMBINE KNOWLEDGE OF DESIGN, MANUFACTURE, AND SUPPORT TO PROVIDE THE CUSTOMER WITH A COMPLETE SOLUTION

## *NORCO Group Limited*

Norco Group are independent specialists in stored electrical energy systems with unrivalled experience and expertise in the delivery of innovative solutions to support the demand for battery backed systems across a wide range of applications.

We supply and manage fleets of industrial traction batteries (forklift, electric vehicles etc.) and chargers that support the materials handling supply chain requirements of a broad range of clients operating in logistics, distribution and retail industries.

Norco Group also specialises in the procurement, installation, maintenance and testing of industrial batteries, stand-by batteries, UPS systems and chargers supporting critical power systems in any industrial or commercial environment, onshore and offshore.

In addition, through significant investment in research and development we are able to provide completely bespoke DC system builds suitable for any application and built-for-purpose solutions utilising our charger systems which have been developed entirely in-house.

We deliver quality products and services on time and to budget achieved through our concept to close out project management. As an independently owned company we have no direct ties to any manufacturer so we can always offer the best and most cost effective solution to our customer requirements.

“Independence, flexibility, technology and scalability are the keys that distinguish our service offering as unique and, we believe unmatched, by any other UK business.”

# EXCELLENCE IN DEVELOPING, BUILDING, INSTALLING & MAINTAINING INNOVATIVE POWER CONVERSION PRODUCTS

## OUR PRODUCTS

Norco operates with a fleet of battery, UPS, Charger and supporting maintenance and installation products for sale or rental in the UK today.

### UPS Systems

Norco provides a complete UPS and battery system design solution from concept to completion.

### Batteries

Norco are an independent supplier of traction batteries, chargers and associated equipment. With

our national network of service engineers we are able to respond to customer call-outs quickly and efficiently and are able to repair and maintain all makes of batteries and chargers.

### UPS and Reserve Power Batteries

As an independent supplier, Norco offer UPS and reserve power batteries from all the major manufacturers and are able to provide competitive quotation for any battery equipment.

### Chargers

In addition to being able to competitively source almost any make and model of industrial battery charger, Norco produces a range of single and three phase thyristor based battery chargers. These are designed and purpose built entirely in-house to meet our customers' specific requirements.

A full design, supply and installation service is available both on and off shore. In situations where the customers' requirements are not being met by a production solution.

BASED NATIONWIDE  
NORCO CAN  
RESPOND TO YOU  
QUICKLY AND  
EFFICIENTLY**

### OUR SERVICES

Norco offers a full array of service and repair items for battery and battery charger service and repair. We also offer a lineup of value-added maintenance products such as Single-Point Watering systems, preventative maintenance checks and service contracts. Choose from hundreds of quality maintenance, repair and replacement parts including hard-to-find components, batteries and chargers, and all fitted and serviced by our own OEM certified engineers if required.

- Battery Maintenance & Repair
- UPS Service & Repair
- Generators
- Design & Development
- PCB Test And Repair

TRAINING

# DELIVERING BESPOKE TRAINING COURSES IN OUR DEDICATED TRAINING FACILITIES AND FULLY EQUIPPED TEST BAY

## Training

Norco has invested in dedicated training facilities with our newly built training room and a fully equipped test bay. We have a wide range of equipment available to tailor courses around the client's needs.

With 25 years' experience within the battery and UPS industry, we are ideally placed to identify the training needs of the end user and can deliver bespoke training courses with both theory and practical elements.

Examples of training courses that we can tailor to suit include:

- The Installation, Operation, Maintenance and Fault Finding of Industrial Battery Systems (Lead Acid and/or NiCad)
- Battery Chargers and UPS Systems

SERVICE

DESIGN & DEVELOPMENT

**WITH A FLEET OF OVER 5000 ASSETS, NORCO CAN PROVIDE YOU WITH THE POWER YOU NEED**

### OUR SERVICES

We are, without doubt, the company which designed and introduced the battery rental concept which is the fore-runner to the many schemes reputed to be available in the industry today. We can provide a rental solution to anyone with a need for either long or short term battery, charger or U.P.S. power.

### UPS

With an extensive fleet of new and ex-customer UPS systems, we have immediate availability of a wide range of UPS systems (750Va – 120kVa) which can be dispatched complete with battery system for critical power requirements on either long or short term hire.

### Batteries

With one of the largest rental fleets available in Europe, NORCO has the ability to provide a battery to suit any application.

### Chargers

Norco produces a range of single and three phase thyristor battery chargers. In addition we have access to an extensive fleet of rental chargers.

### Equipment

Since 1990, backup equipment and battery cells both sold and rented by NORCO remain in everyday, trouble-free operation. Year after year our growing customer base has come to depend on NORCO to bring the best solutions and newest product innovation to market in order to meet their ever more demanding power requirements while also continuing to support and service now obsolete but commercially important installations. As the industry leader, NORCO has satisfied more than 2,500 customers in the UK alone.
