

Your Global
ROV Specialist

Complete ROV solutions,
for exceptional subsea operations

ROVOP

Knowledge in depth: the defining principle of our ROV service offering to customers around the world

**We challenge ourselves every day to find safer
and smarter ways of working... even better ways
to deliver on your priorities and objectives**

Our track record and market reach in subsea robotics services position ROVOP as a partner of choice for subsea activities in multiple sectors.

Our complete ROV solutions — high quality assets and tooling applications, together with industry-leading personnel — reduce risk and cost, while maximising safety and operational performance.

Offshore Wind

Hydrocarbons

Power & Telecoms

ROVOP

▲ Offshore Wind

Our business was born in renewables; we have extensive experience working in the challenging high current, high turbidity, low visibility environment often found in offshore wind projects.

- ✓ UXO
- ✓ CONSTRUCTION SUPPORT
- ✓ IRM
- ✓ DECOM

▲ Hydrocarbons

We bring a wealth of experience to the lifecycle of offshore oil & gas activities; exploration, development, production, plug & abandonment and subsea infrastructure decommissioning.

- ✓ SURVEY
- ✓ DRILL SUPPORT
- ✓ CONSTRUCTION SUPPORT
- ✓ IMR
- ✓ DECOM

▲ Power & Telecoms

We have built up considerable experience in the subsea cable sector, having carried out many successful projects across the globe, strongly positioning us to successfully overcome the challenges faced in your operations.

Your Global ROV Specialist

Putting safety and efficiency at the core of our operations across all key sectors.

ROVOP

Technologically advanced fleet of ROVs to service multiple markets

Electric inspection and light work-class fleet:

TIGER

MOHICAN

COUGAR XT

Committed to operational excellence

Advanced underwater technology and solutions

We have an extensive fleet of advanced underwater technology to support your global operations effectively and safely.

Our wide range of vehicle type and in depth capability, allows us to tailor a solution to fit the challenge at hand.

Hydraulic work-class fleet:

SCHILLING HD

PANTHER XT PLUS

COMANCHE

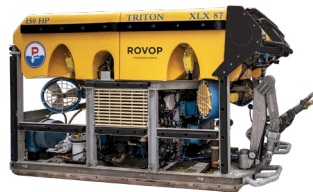

SEAEYE LYNX

TRITON XLS

TRITON XLX

SCHILLING UHD GEN III

Contact us today – and capitalise on our knowledge in depth

ROVOP people across all our locations are ready to use their experience and technical know-how to assess your requirements and create the optimum ROV solution, so you benefit from safe, efficient and reliable project delivery.
