BOOK

Date: 4 - 6 November 2025

Location: Paris, France

Join the **UK & EIC Pavilion at World Nuclear Exhibition (WNE) 2025** to secure a prime stand location, enhanced promotion and visibility as well as access to industry experts through our extensive networking opportunities.

WNE is the leading international event for all players in the civil nuclear industry, bringing together professionals from the entire value chain who operate around the world and contribute to the excellence of the industry every day.

23,600+
Participants

88
Countries

Market Intelligence

The nuclear sector is experiencing a resurgence of interest, driven by a number of factors. The global energy transition, coupled with the increasing demand for reliable and clean power sources, has reignited discussions around nuclear power. Additionally, advancements in Small Modular Reactor (SMR) technology offer promising solutions for countries seeking to initiate or expand their nuclear programmes.

Recent announcements, such as the UK's third nuclear power project at Wylfa and Canada's 4.8 GW Bruce C nuclear expansion, underscore this renewed global interest. In France, President Emmanuel Macron's ambitious plans to construct six European Pressurized Reactors (EPRs) and additional eight large-scale reactors and SMRs demonstrate the country's commitment to nuclear power. However, the challenges associated with large-scale nuclear projects, as evidenced by the delays and cost overruns of the Flamanville 3 unit, highlight the need for innovative approaches and robust project management.

SMRs, with their smaller size, modular design, and enhanced safety features, offer a compelling proposition for countries seeking to enter the nuclear market or expand their existing nuclear fleets. In 2024, the number of countries actively pursuing SMR development has grown to 21, indicating a shift in global acceptance towards this technology. SMRs are particularly well-suited to power-intensive industries such as AI data centres and remote communities that traditionally rely on fossil fuels.

To successfully realize the potential of nuclear power, including SMRs, significant updates in financing mechanisms and supply chain development are crucial. While large-scale nuclear projects have historically attracted substantial investment, the nascent SMR market requires specific support to encourage innovation and accelerate deployment.

BOOK

Benefits of Participating on the UK & EIC Pavilion

Being part of the UK & EIC Pavilion offers significant added value activities which are not available as an individual exhibitor:

Prime
Location

Enhanced
Promotion

High visibility
presence

Access to industry
experts

VIP visitors &
pavilion tours

Dedicated project
manager

Appointed EIC
freight
partner & stand
designer

Company entry in
the UK & EIC
Group Capabilities
Brochure

Help to identify
potential partners

HOW TO
BOOK

Your Stand

Shell scheme package includes:

- Back & side hard walls (graphics optional extra, see below)
- Fascia name board
- Lighting
- 1 power outlet per 9sqm
- Access to UK & EIC Lounge
- 1 round table & 3 chairs
- 1 counter with logo
- Literature rack
- Wastepaper basket
- Project management
- All previous page listed benefits

*Please note that any stand enhancements such as wall graphics, AV, additional sockets etc will need to be ordered and charged separately with EIC's appointed stand builder or the third-party contractor of your choice.
